INGLISH AND CHINESE DICTIONARY. WITH THE PUNTI AND MANDAEIN PRONUNCIATION.

An Anglo-Chinese Dictionary, published at the

Daily Press Office, Hongkong.

For comprehensiveness and practical service this Work stands unrivalled. All the new FIHE Al American Bark words which the Chinese have to late years been compelled to coin to express the numerous cbjects in machinery, photography, telegraphy Killeran. Master, will load here for the above and in science generally, which the rapid advance | Port, and will have quick despatch. of foreign relations has imposed upon them, are For Freight, apply to here given in extense. Each and every word is fully illustrated and explained, forming exercises for students of a most instructive nature. Both the Court and Punti pronunciations are given, the accents being carefully marked on the best principle hitherto attained. The typography of hody, thereby effecting a vest economy of space, achieving a clearness not previously attained, and dispensing with those vast margins and vacant spaces which have heretofore charac-

terized Chinese publications. To illustrate the vast scope of the work, the THE A1 British Ship. following facts are submitted for consideration :---Chaimers' Vocabulary contains about 16,000 Chinese characters, and Medhurst's English Campbell, Master, will load here for the above and Chinese Dictionary about 100,000, whilst Port, and will have quick despatch. this work contains more than 50,000 English For Freight, apply to words, and upwards of 600,000 Chinese characters. Again, despite all the grammars and other elementary works as yet published, the FOR LOND student of this difficult language absolutely re-Rates, in First-class Godowns, under European quires examples to display the various applications and equivalents of different words which have one general meaning. Of these examples Clague, Master, will load here for the above this work contains more than five times as Port, and will have quick despatch. many as any other Dictionary hitherto pub-

For practical purposes the arrangement of the work is so complete, that a reference to its pages enables a person who understands English to communicate effectively with natives who understand nothing but Chinese. In this respect the work will be found indispensable to all Hongkong and China by Messra. J. & R. Ten-Europeans residing in China, and to the natives NEXT, Glasgow, and Messrs. DAVID CORSAR & themselves it explains subjects fully with which very few indeed of them are perfectly acquainted.
